Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-19, drawn to a multi-charged beam lens and exposure apparatus, classified in class 250, subclass 396R.
- II. Claim 20, drawn to a device manufacturing method involving drawing a pattern on a photosensitive substrate and subsequently developing the substrate, classified in class 430, subclass 327.

The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product, to wit: since the process *as claimed* only involves the steps of drawing a pattern on a photosensitive substrate and subsequently developing the substrate, a conventional optical lens could be used for drawing the pattern.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17(i).
